

I do not want them to do away with the no call list. every day and night we would have 10 calls. we couldn't eat or watch tv with out the phone ringing. they don't take no for an answer I have slamed down the phone only for someone to call back. I do not and thousands of others do not want to go through all this again. those people do not know what no means and I get tired of getting up and anwering a tel-marketer. leave us in peace. why should they mean more to you then the people who are being harressed.
